TITLE V BLOCK GRANT APPLICATION
FORMS (2-21)
STATE: DC
APPLICATION YEAR: 2011

MCH BUDGET DETAILS FOR FY 2011

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: DC

1. FEDERAL ALLOCATION
(Item 15a of the Application Face Sheet [SF 424])
Of the Federal Allocation (1 above), the amount earmarked for: $ 7,066,666

  A.Preventive and primary care for children:

  $ 2,120,000 (30 %)

  B.Children with special health care needs:

  $ 2,120,000 (30 %)
(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

  C.Title V admininstrative costs:

  $ 350,000 (4.95 %)
(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424) $ 0

3. STATE MCH FUNDS (Item 15c of the SF 424) $ 5,300,000

4. LOCAL MCH FUNDS (Item 15d of SF 424) $ 0

5. OTHER FUNDS (Item 15e of SF 424) $ 0

6. PROGRAM INCOME (Item 15f of SF 424) $ 0

7. TOTAL STATE MATCH (Lines 3 through 6) $ 5,300,000
(Below is your State's FY 1989 Maintainence of Effort Amount)
$ 5,288,000

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL) $ 12,366,666
(Total lines 1 through 6. Same as line 15g of SF 424)

9. OTHER FEDERAL FUNDS
(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS:	$ 0
b. SSDI:	$ 100,000
c. CISS:	$ 105,000
d. Abstinence Education:	$ 0
e. Healthy Start:	$ 3,700,000
f. EMSC:	$ 0
g. WIC:	$ 20,431,486
h. AIDS:	$ 0
i. CDC:	$ 8,940,362
j. Education:	$ 0
k. Other:	
Project Launch	$ 850,000
State Implementation	$ 300,000
TBI	$ 106,000

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9) $ 34,532,848

11. STATE MCH BUDGET TOTAL $ 46,899,514
(Partnership subtotal + Other Federal MCH Funds subtotal)

FIELD LEVEL NOTES

1. **Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
   Field Name: PregWomenExpended
   Row Name: Pregnant Women
   Column Name: Expended
   Year: 2009
   Field Note:
   The total includes the amount of funding from the two Healthy Start grants expended on this population. The budgeted fiqure did not included the Healthy Start funding.

2. **Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
   Field Name: Children_0_1Expended
   Row Name: Infants <1 year old
   Column Name: Expended
   Year: 2009
   Field Note:
   The total includes the amount of funding from the two Healthy Start grants expended on this population. The budgeted fiqure did not included the Healthy Start funding.

3. **Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
   Field Name: CSHCNExpended
   Row Name: CSHCN
   Column Name: Expended
   Year: 2009
   Field Note:
   The total includes local funding that was dedicated to services for children with special health care needs.

4. **Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
   Field Name: AdminBudgeted
   Row Name: Administration
   Column Name: Budgeted
   Year: 2009
   Field Note:
   Realignment of staff has caused CHA to properly change this Administrative Budget line. Some staff were performing administrative functions but were listed incorrectly as program staff. The budget was not reflected appropriately and is being corrected here. Ergo the reduction in other budget lines. In addition, local funds have been utilized to address many more personnel costs in the adminstrative area.

5. **Section Number:** Form4_I. Federal-State MCH Block Grant Partnership
   Field Name: AdminExpended
   Row Name: Administration
   Column Name: Expended
   Year: 2009
   Field Note:
   The calssification of staff functions used in the prior year was not correct. The level of staff listed as administrative was therefore skewed.

FIELD LEVEL NOTES

1. **Section Number:** Form5_Main
    Field Name: DirectHCBudgeted
    Row Name: Direct Health Care Services
    Column Name: Budgeted
    Year: 2011
    Field Note:
    Increase is due to needed gap filling services.

2. **Section Number:** Form5_Main
    Field Name: EnablingBudgeted
    Row Name: Enabling Services
    Column Name: Budgeted
    Year: 2011
    Field Note:
    The budget allocation for enabling services was increased to cover the cost of grants issued by CHA for case management care coordination and transition services.

3. **Section Number:** Form5_Main
    Field Name: PopBasedBudgeted
    Row Name: Population-Based Services
    Column Name: Budgeted
    Year: 2011
    Field Note:
    The budget allocation for population based services was decreased because additional funding was provided to enabling services and Children with Special Healh Care Needs due to the loss of state funds for those programs.

4. **Section Number:** Form5_Main
    Field Name: PopBasedBudgeted
    Row Name: Population-Based Services
    Column Name: Budgeted
    Year: 2009
    Field Note:
    Population based Services amountt decreased from 2007 to 2008 and then increased in 2009. This is due to the fact that the DOH is moving from a local health department focus to one more aligned with a state health department. Less direct serivces are being provided. Budget amounts for enabling services and infrastructure building increased as dollars are contracted out through RFAs and RFPs.

5. **Section Number:** Form5_Main
    Field Name: InfrastrBuildBudgeted
    Row Name: Infrastructure Building Services
    Column Name: Budgeted
    Year: 2011
    Field Note:
    Several activiies were contracted out of CHA, now being performed by the Office of Grants Monitoring and Program Evaluation, resulting in a decrease in funding for this budget category.

FORM 6

NUMBER AND PERCENTAGE OF NEWBORNS AND OTHERS SCREENED, CASES CONFIRMED, AND TREATED

Sect. 506(a)(2)(B)(iii)

STATE: DC

Total Births by Occurrence: 15,752   Reporting Year: 2008

FIELD LEVEL NOTES

1. **Section Number:** Form9_Main
   Field Name: hnumber_2
   Row Name: State MCH toll-free hotline telephone number
   Column Name: FY
   Year: 2011
   Field Note:
   "311" is the Districts Unified Call Center which connects a caller to DOH for information about MCH issues. While the call center does not have the capacity to collect data on our MCH calls directly, CHA has initiated measures internally to begin next year collecing data on all calls directed from 311 and 1-8000-Mom-Baby.

1. State MCH Administration:
(max 2500 characters)

The Community Health Administration (CHA) continues its oversight and management responsibilities of the Title V Maternal and Child Health Block grant. Its responsibilities include but are not limited to: promoting the goals and objectives of the Title V grant, budget management, development and oversight of sub grants to community based organizations providing programs to support Title V objectives, leading and/or participating in inter- and intra- agency collaborative efforts, periodically reporting the status of activities and accomplishment of objectives, and attending HRSA meetings. The mission of the Community Health Administration is to improve health outcomes for targeted populations by promoting coordination within the health care system, by enhancing access to prevention, medical care and support services, and by fostering public participation in the design and implementation of programs for District of Columbia women, infants, children (including children with special health care needs) and other family members. The mission also is to provide chronic and communicable disease prevention and control services, community-based forums and grants, expert medical advice, health assessment reports, and pharmaceutical procurement and distribution, disease investigations and disease control services to District residents, workers and visitors so that their health status is improved. DOH's strategic plans include the adapting a model for better understanding the development of disease and the promotion of health

Form Level Notes for Form 11

The death rate among children 1-14 years old caused by motor vehicle crashes has decreased from 3.2 deaths caused by motor vehicle accidents per 100,000 children in the District in 2007 to 1.1 motor vehicle related deaths per 100,000 children in the District in 2008. An examination of the three year trends shows a marked decrease from 4.2/100,000 in 2006, 3.2/100,000 in 2007 and 1.1/100,000 in 2008.

PERFORMANCE MEASURE # 01

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

Annual Objective and Performance Data

	2005	2006	2007	2008	2009
Annual Performance Objective	100	100	100	98	90
Annual Indicator	NaN	100.0	100.0	86.0	100.0
Numerator	0	30	30	43	41
Denominator	0	30	30	50	41
Data Source				Newborn Screening Program	Newborn Screening Program
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2.The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. *(Explain data in a year note. See Guidance, Appendix IX.)*

   Column Name:
   Year: 2009
   Field Note:
   Program identified 41 newborns with confirmed presumptive positives. All of them entered treatment.. The breakdown is as follows:

   Acylcarnitine 1
   Amino Acid 1
   CAH 17-OHP 0
   Cystic Fibrosis 1
   Biotinidase Deficiency 1
   Congenital Hypothyroidism 6
   Hemoglobinopathies 31
   Galactosemia 0
   TOTAL 41

2. **Section Number:** Form11_Performance Measure #1
   Field Name: PM01
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Realignment in CHA, as well as loss of some key personnel, left the program with less documentation than in previous years. The previous administration did not have procedures in place for properly storing or archiving data on follow-up of positive screens. There was also no way to reconstruct the missing data after the fact. Therefore precautions need to be in place now. CHA is looking into other data retrieval mechanisms as well as data storage mechanisms. One DOH employee will maintain the quality of the data and the data wil be stored in a central location.

3. **Section Number:** Form11_Performance Measure #1
   Field Name: PM01
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   2007 data is not available at this time and will be updated.

   CHA discovered previously that the wrong information was being entered from Form 6. This is noted and will be corrected in the future.

PERFORMANCE MEASURE # 02

The percent of children with special health care needs age 0 to 18 years whose families partner in decision making at all levels and are satisfied with the services they receive. (CSHCN survey)

Annual Objective and Performance Data

	2005	2006	2007	2008	2009

Field Level Notes

1. **Section Number:** Form11_Performance Measure #6
    Field Name: PM06
    Row Name:
    Column Name:
    Year: 2009
    Field Note:
    This is an interim year for the CSHCN survey and indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006.Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. The same questions were used to generate the NPM02 indicator for both the 2001 and the 2005-2006 CSHCN survey. The next survey is scheduled to begin in 2009.
    2005/2006 Revisions & Changes:
    In the 2005-2006 version of the NS-CSHCN, significant wording changes and new additions were made to the set of questions used to assess Transition to Adulthood. The result is an improved and more robust assessment of this important concept. The 2001 version of the outcome is based on CSHCN ages 13-17; the 2005/06 outcome is calculated for CSHCN ages 12-17. Take these changes into consideration when comparing results across survey years. See Additional Notes section below for more details.

    Additional Notes:
    The Transition to Adulthood summary measure is a composite score derived from two different subparts based on 8 different survey items. Technical expert panel review of the 2001 NS-CSHCN methods for assessing transition to adulthood led to significant revisions and additions to the 2005-2006 version of these questions. In particular, filter questions were added to identify CSHCN who needed the services being assessed and a new question was added to assess whether health care providers help CSHCN to take increasing responsibility for self-care.

    The next survey began in 2009. Data has not been posted on the website and when the 2009 data becomes available, this measure will be updated.

Field Level Notes

1. **Section Number:** Form11_Performance Measure #8
   Field Name: PM08
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Currently, the number of births in 2008 among teens ages 15-17 is used to report information for 2009. The 2009 data will be available in 2011, and this measure will be updated.

   The goal of 40 should remain at 32. However it cannot be changed for current or past years. A value of 35 has been chosen fo the next 5 yearrs.

   Source Numerator: The District of Columbia State Center for Health Statistics 2008 Birth file.

   Source Denominator: United States Census Bureau 2008 American Fact Finder Population Estimates for the District of Columbia available at: http://factfinder.census.gov/servlet/DTGeoSearchByListServlet?ds_name=ACS_2008_1YR_G00_&_lang=en&_ts=295373522343

2. **Section Number:** Form11_Performance Measure #8
   Field Name: PM08
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   The birth rate per 1,000 teen mothers ages 15-17 years decreased by 1.7% from a rate of 41.1 births per 1,000 in 2007 compared to 40.4 births per 1,000 in 2008. However, this does not meet the Annual Performance Objective of 32 births per 1,000 teens aged 15-17.

   Since 2004, birth rates among this age group have been fluctuating. However, examination of three-year rolling averages shows a slight change in the birth rate for teen mothers ages 15-17: from 39.5 per 1,000 in the period 2004-2006 to 40.0 per 1,000 during the period 2006-2008.

   Source Numerator: The District of Columbia State Center for Health Statistics 2008 Birth file.

   Source Denominator: United States Census Bureau 2008 American Fact Finder Population Estimates for the District of Columbia available at: http://factfinder.census.gov/servlet/DTGeoSearchByListServlet?ds_name=ACS_2008_1YR_G00_&_lang=en&_ts=295373522343

   Data source: DC DOH Oral Health Program

   This reporting period, 11 District of Columbia Public Schools were targeted to receive Oral Health services (2 fewer than last year). These schools met treatment inclusion criteria that at least one-half of students enrolled were eligible for the free or reduced lunch program; students also were required to return signed permission slips. As in previous years, the number of eligible students and those who returned permission slips remains low. The rate of returned signed consent forms fluctuates in spite of our best efforts. In 2009, the return rate was 52% for the 11 elementary schools.

   The percent of 3rd graders receiving a sealant from the Oral Health program is somewhat lower in 2009 (72.6%) compared to 2008 (76.4%). It does not meet the 2009 Annual Performance Objective of 80 percent 3rd grade children to receive protective sealants on at least one permanent molar tooth.

2. **Section Number:** Form11_Performance Measure #9
   Field Name: PM09
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Numerator : Reflects the number of 3rd graders who received a sealant.

   Denominator: Reflects the number of eligible 3rd graders

   This reporting period, 13 District of Columbia Public Schools were targeted to receive Oral Health Services. These Schools met the criteria that at least one-half of the student enrollment were eligible for free or reduced lunch program.

   The number of eligible students are therefore eligile for the free lunch program and those who returned permission slips were included in oral health program.

3. **Section Number:** Form11_Performance Measure #9
   Field Name: PM09
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   This reporting period, 6 District of Columbia Public Schools were targed to receive oral heath services (2 more than last year). These schools met the criteria that at least one-half of the student enrollment were eligible for the free or reduced lunch program. Therefore, the number of eligible students (including those who returned permission slips) and including those who used the service remained low. In addition, the schools served had overall small enrollment numbers for third grade classes. The denominator reflects the number of eligible 3rd graders; the numerator reflects the number 3rd graders who received a sealant.

   In 2006 the denominator was the number of all eligble children. This caused the annual indicator to be much lower, and therefore was not used again in this reporting year.

   It can be noted that DC's oral health program is expanding to provide services in all grades in participating elementary schools.

PERFORMANCE MEASURE # 10

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

Annual Objective and Performance Data

Field Level Notes

1. **Section Number:** Form11_Performance Measure #10
   Field Name: PM10
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District has a 2-year delay in reporting death data. Currently the number of deaths in 2008 among infants and children aged 1-14 caused by motor vehicle crashes is used to report information for 2009. The 2009 data will be available and reported in 2011.

   A goal of 3 should logically be changed to 2 as reflected in upcoming years. However it cannot be changed in the system for this current year.

   Source Numerator: The District of Columbia State Center for Health Statistics 2008 Death File.

   Source Denominator: United States Census Bureau 2008 American Fact Finder Population Estimates for the District of Columbia available at: http://factfinder.census.gov/servlet/DTGeoSearchByListServlet?ds_name=ACS_2008_1YR_G00_&_lang=en&_ts=295373522343 .

   Notes:

   The death rate among children 1-14 years old caused by motor vehicle crashes has decreased from 3.2 deaths caused by motor vehicle accidents per 100,000 children in the District in 2007 to 1.1 motor vehicle related deaths per 100,000 children in the District in 2008. An examination of the three year trends shows a marked decrease from 4.2/100,000 in 2006, 3.2/100,000 in 2007 and 1.1/100,000 in 2008.

2. **Section Number:** Form11_Performance Measure #10

Denominator: United States Census Bureau. The 2007 American Community Survey Population Estimates for the District of Columbia. http://www.census.gov/popest/states/asrh/SC-EST2007-02.html

Within the District, although our numbers for deaths to children aged 14 years and younger remain low ,but still above our annual performance objectiv of no more than 2 deaths per 100,000 children due to motor vehicle accidents. On average the District of Columbia has a low number of deaths within this age range due to motor vehicle accidents.

PERFORMANCE MEASURE # 11

The percent of mothers who breastfeed their infants at 6 months of age.

Annual Objective and Performance Data

Field Level Notes

1. **Section Number:** Form11_Performance Measure #12
   Field Name: PM12
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   2009 newborn hearing data was obtained from the AURIS database system used by CHA. 15,149 screens were reported for 10,484 children with 2009 DOBs. The number of dulicate records ranged freom 1 - 36. Of this group 9,500 children had a single record, while 984 newborns had 5,649 records of screenings.

   The tracking system continues to generate duplicate records as occurred last year.

2. **Section Number:** Form11_Performance Measure #12
   Field Name: PM12
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   2008 newborn hearing data was obtained from the AURIS database and reporting system. 14,199 screening occurred in 2008. Review of data in both 2007 and 2008 indicate that there are numerous duplicate child records in the system.

   The program is working with the contractor is taking steps to eliminate or reduce the number of duplicate records in the system. After removing dulicate records it was found that the information system has data on reported screenings at levels similar to last year.

   2008 Birth data is provided by State Center for Health Statistics and is their most recent estimate of all births in the District of Columbia.

3. **Section Number:** Form11_Performance Measure #12
   Field Name: PM12
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   2007 newborn hearing data was obtained from the AURIS database and linked with the 2007 birth file. Not all birthing facilities have the resources to input directly into the information system.

   The program obtains data directly from the hospitals and indicates that 14,995 tests were taken of children born in 2007. It is unclear what is the discrepency between the data reported by the sites and the data inputed into the information system.

PERFORMANCE MEASURE # 13

Percent of children without health insurance.

1. **Section Number:** Form11_Performance Measure #17
   Field Name: PM17
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Data for 2009 will be reported in 2011. Data for 2008 is reported here.

2. **Section Number:** Form11_Performance Measure #17
   Field Name: PM17
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Numerator: Number of very low birth weight infants (<1500 grams) delivered at District hospitals with neonatal intensive care units.
   Denominator: Total number of very low birth weight infants (<1500 grams)
   Data source: The District of Columbia State Center for Health Statistics 2008 Birth file.

   Very low birth weight infants (<1500 grams) delivered at District hospitals with neonatal intensive care units increased by less than 1 %, from 76.0 percent in 2007 compared to 76.1 percent in 2008. However, this measure is lower compared to previous years 2004 through 2006 (76.8%; 79.0%; 81.6%, respectively) and does not meet the Annual Performance Objective of 80% established for this measure.

3. **Section Number:** Form11_Performance Measure #17
   Field Name: PM17
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   The percent of very low birth weight infants delivered at facilities for high-risk deliveries and neonates increased from 81.6 percent in 2006 to 99.0 percent in 2007, an increase of 21.3 percent.

   Source: The District of Columbia State Center for Health Statistics 2007 Birth File.

   The numerator reflects the number of very low birth weight infants delivered at District hospitals with neonatal intensive care units were included.

   The denominator reflects the total number of District very low birthweight births.

PERFORMANCE MEASURE # 18

Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester.

   Column Name:
   Year: 2008
   Field Note:
   Numerator: Number of infants born to pregnant women who received prenatal care in the first trimester.
   Denominator: Number of infants born to women where entry into prenatal care was recorded (does not include 963 missing cases for which prenatal care was not reported).
   Data source: The District of Columbia State Center for Health Statistics 2008 Birth file.

   Women who received prenatal care in the first trimester increased by 2.3%, to 74.7 percent in 2008 compared to 73.0 percent in 2007, but does not meet the Annual Performance Objective of 78% established for this measure. This indicator evidenced a moderate yet steady decrease for the period 2004-2007 and this is the first year to show improvement.

3. **Section Number:** Form11_Performance Measure #18
   Field Name: PM18
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   The percent of infants born to women receiving prenatal care in the first trimester decreased from 75 percent in 2006 to 73 percent in 2007, a decrease of 2.6 percent.

   Source: The District of Columbia State Center for Health Statistics 2007 Birth File.

   The numerator reflects the number of women that reported recieving prenatal care in the first trimester.

   The denominator reflects the number of District women that indicated when their prenatal care began.

Form Level Notes for Form 11

The death rate among children 1-14 years old caused by motor vehicle crashes has decreased from 3.2 deaths caused by motor vehicle accidents per 100,000 children in the District in 2007 to 1.1 motor vehicle related deaths per 100,000 children in the District in 2008. An examination of the three year trends shows a marked decrease from 4.2/100,000 in 2006, 3.2/100,000 in 2007 and 1.1/100,000 in 2008.

Field Level Notes

1. **Section Number:** Form11_State Performance Measure #4
   Field Name: SM4
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Data for 2009 will be reported in 2011. Data for 2008 is reported here.

2. **Section Number:** Form11_State Performance Measure #4
   Field Name: SM4
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Numerator: Number of women who self-reported tobacco use during the pregnancy
   Denominator: Number of women who answered this item on the DC birth certificate about tobacco use
   Data source: The District of Columbia State Center for Health Statistics 2008 Birth file.

   The percent of women who self-reported tobacco use while pregnant increased from 3.5 percent in 2007 to 4.4 percent in 2008 and represents a 28.8 percent increase. The Annual Performance Objective for this measure is 1.7 percent.

   Note: The change in the 2013 performance objective reduction from 2.5 to 2.0 the continuing trend is that less women are smoking during their pregnancy. Efforts are also underway within DOH programs such as Healthy Start and community based organizations to encourage pregnant/parenting mothers to cease and quit smoking.

3. **Section Number:** Form11_State Performance Measure #4
   Field Name: SM4
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   The prevalence of tobacco use among pregnant women decreased from 3.7 percent in 2006 to 3.4 percent in 2007, a decrease of 5.4 percent.

   Source: District of Columbia State Center for Health Statistics 2007 Birth file.

   Numerator: The number of women who self reported smoking during pregnancy.

   Demominator: Out of the 8,870 live births, only 8869 women answered the question about smoking during their pregnancy for the birth certificate.

STATE PERFORMANCE MEASURE # 6 - REPORTING YEAR

Percent of resident women who give birth with no prenatal care or entry into prenatal care in 3rd trimester

Annual Objective and Performance Data

	2005	2006	2007	2008	2009
Annual Performance Objective	5.4	5.3	5	5	5
Annual Indicator	5.6	6.4	6.4	5.8	5.8
Numerator	392	471	494	478	478

Data Source				2008 DC Birth File (Vital Statistics)	2008 DC Birth File
Is the Data Provisional or Final?				Provisional	Provisional

Annual Objective and Performance Data

	2010	2011	2012	2013	2014
Annual Performance Objective	5	5	5	5	
Annual Indicator					
Numerator					
Denominator					

Future year objectives for state performance measures from needs assessment period 2006-2010 are view-only. If you are continuing any of these measures in the new needs assessment period, you may establish objectives for those measures on Form 11 for the new needs assessment period.

Field Level Notes

1. **Section Number:** Form11_State Performance Measure #6
   Field Name: SM6
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Data for 2009 will be reported in 2011. Data for 2008 is reported here.

2. **Section Number:** Form11_State Performance Measure #6
   Field Name: SM6
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Numerator: Number of infants born to women with no prenatal care or entry into prenatal care in the third trimester.
   Denominator: Number of infants born to women where entry into when prenatal care began was recorded (does not include 963 missing cases for which prenatal care was not reported).
   Data source: The District of Columbia State Center for Health Statistics 2008 Birth file.

   Infants born to women receiving no prenatal care or whose entry into prenatal care began in the third trimester decreased from 6.4 percent in 2007 to 5.8 percent in 2008, an overall decrease of 8.5%. However, this does not meet the Annual Performance Measure of 5 percent of resident women giving birth with no/3rd trimester entry into prenatal care.
   .

3. **Section Number:** Form11_State Performance Measure #6
   Field Name: SM6
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   Source: The District of Columbia State Center for Health Statistics 2007 Birth File. The numerator reflects the number of District women who self reported recieving prenatal care (PNC) in the third trimester or no PNC during their pregnancy.

   The percent of resident women who give birth with no prenatal care or prenatal care in the third trimester showed no change, at 6.4 percent in 2006 and 2007.

   Note out of 8,870 live births, the denominator reflects the number of women (n=7728) that reported beginning prenatal care in the 3rd trimester or no prenatal care at all.

STATE PERFORMANCE MEASURE # 7 - REPORTING YEAR

Incidence of repeat births for teens less than 19 years of age

Annual Objective and Performance Data

	2005	2006	2007	2008	2009
Annual Performance Objective	19.3	19	18.5	18.5	18.5
Annual Indicator	14.0	12.1	12.5	12.0	12.0

Field Level Notes

1. **Section Number:** Form11_State Performance Measure #9
   Field Name: SM9
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Data for 2009 will be reported in 2011. Data for 2008 is reported here.

2. **Section Number:** Form11_State Performance Measure #9
   Field Name: SM9
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Numerator: Number of preterm births < 37 weeks gestation
   Denominator: Number of live births where gestation was recorded (n=9097); excludes missing data (n=38)
   Data source: The District of Columbia State Center for Health Statistics 2008 Birth file.

   Infants born preterm, <37 weeks gestation, remained the same in 2008 as in 2007 (12.2%) and does not meet the Annual Performance Objective of 11% established for this measure.

3. **Section Number:** Form11_State Performance Measure #9
   Field Name: SM9
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   The percent of pre term births decreased from 13.4 percent in 2006 to 12.2 percent in 2006, a decrease of 8.9 percent.

   Source: The District of Columbia State Center for Health Statistics 2007 Birth File.

   The numerator (n=1076) is the number of births < 37 weeks gestation.

   The denominator (n=8818) of live birth excludes the missing data n=52.

Form Level Notes for Form 12

Deaths due to all causes among children aged 1-14 (n = 36) continues to increase in the District of Columbia. The rate of 39 per 100,000 in 2008 is higher than the Annual Performance Objective of 24 per 100,000 established for this measure.

OUTCOME MEASURE # 01

The infant mortality rate per 1,000 live births.

Annual Objective and Performance Data

	2005	2006	2007	2008	2009
Annual Performance Objective	9.4	9.4	9.4	9.4	9.4

Field Level Notes

1. **Section Number:** Form12_Outcome Measure 1
   Field Name: OM01
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   There is a 2-year lag period in the District for reporting birth and death data. Data for 2009 will be available in 2011. 2008 data is reported here,. When 2009 data becomes available, this measure will be updated.

   Source Numerator: The District of Columbia State Center for Health Statistics 2008 Linked Infant Birth/Death File.

   Source Denominator: The District of Columbia State Center for Health Statistics 2008 Birth File.

2. **Section Number:** Form12_Outcome Measure 1
   Field Name: OM01
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Source Numerator: The District of Columbia State Center for Health Statistics 2008 Linked Infant Birth/Death File.

   Source Denominator: The District of Columbia State Center for Health Statistics 2008 Birth File.

   The infant mortality rate per 1,000 live births decreased by 16.3% from a rate of 13.1 infant deaths per 1,000 live births in 2007 compared to 10.9 infant deaths per 1,000 live births in 2008. However, this does not meet the Annual Performance Objective of a 9.4 infant mortality rate per 1,000 live births.

   Since 2004, the infant mortality rate has been fluctuating. However, examination of three-year rolling averages shows a downward trend in infant mortality: from 12.2 per 1,000 live births in the period 2004-2006 to 11.8 per 1,000 live births during the period 2006-2008.

3. **Section Number:** Form12_Outcome Measure 1
   Field Name: OM01

   Denominator: White IMR per 1,000 live births

   Source Numerator and Denominator: The District of Columbia State Center for Health Statistics 2008 Linked Infant Birth/Death File and The District of Columbia State Center for Health Statistics 2008 Birth File.

   The infant mortality rate decreased for both blacks and whites during 2008 compared to 2007. This decrease was more pronounced for whites (decrease = 37.3%) compared to blacks (decrease = 3.6%). This resulted in an increase in the ratio of the black infant mortality rate to the white infant mortality rate from 3.4 in 2007 to 5.2 in 2008 and fails to meet the Annual Performance Objective of 4.5.

   Since 2004, the ratio of the black infant mortality rate to the white infant mortality rate has been fluctuating. Examination of three-year rolling averages for this ratio shows a downward trend: from 5.9 in the period 2004-2006 to 5.1 during 2006-2008.

3. **Section Number:** Form12_Outcome Measure 2
   Field Name: OM02
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   Source: The District of Columbia State Center for Health Statistics (SCHS) 2007 Linked Infant Birth/Death File and the SCHS 2007 Birth File were used.

   The ratio is represented by the mortality rate for black infants/mortality rate for white infants by the definition given in TIVS guidance. The race of the mother is used.

OUTCOME MEASURE # 03

The neonatal mortality rate per 1,000 live births.

1. **Section Number:** Form13_Main
    Field Name: Question1
    Row Name: #1. Family members participate on advisory committee or task forces...
    Column Name:
    Year: 2011
    Field Note:
    Family members do participate on advisory boards and committees such as the Perinatal and Infant Healh Advisory Board and the CSHCN Advisory Board. They receive training and mentoring when apprpropriate, but are not reimbursed. Two parents on the CSHCN Adv Board did receive a scholarship to AMCHP an one year membership.

2. **Section Number:** Form13_Main
    Field Name: Question2
    Row Name: #2. Financial support (...) is offered for parent activities or parent groups.
    Column Name:
    Year: 2011
    Field Note:
    Financial support was offered to 2 CSHCN Advisory Board members who attended AMCHP as representatives of DC. Also one parent from the Peritatal and Infant Health Advisaory Board was sent to AMCHP as the DC parent advocate to AMCHP. Parents on Advisory boards are offered technical assisance in completing grant proposals at the PreApplication Conferences held during the time period when submitting propopsals for Title V funding. Also he Office of Grants Management offers trainings to potentila grantees from developing budets to evaluation methods

3. **Section Number:** Form13_Main
    Field Name: Question3
    Row Name: #3. Family members are involved in the Children with Special Health Care Needs...
    Column Name:
    Year: 2011
    Field Note:
    Family members who are involvded in the CSHCN adisory board are involved in reviewing the grant application, as are all the advisory board members.

4. **Section Number:** Form13_Main
    Field Name: Question4
    Row Name: #4. Family members are involved in service training of CSHCN staff and providers.
    Column Name:
    Year: 2011
    Field Note:
    CSHCN advisory board members are invifed to varous in service trainings along with other staff members. We are very inclusive circulating traing information through various email mechanisms.

5. **Section Number:** Form13_Main
    Field Name: Question5
    Row Name: #5. Family members hired as paid staff or consultants to the State CSHCN program...
    Column Name:
    Year: 2011
    Field Note:
    Family members or parents are not paid as staff consultants to the state CSHCN program. The government does not allow sole source contracts, therefore it is very difficult to hire a specific person if there are other capable applicants.

6. **Section Number:** Form13_Main
    Field Name: Question6
    Row Name: #6. Family members of diverse cultures are involved in all of the above activities
    Column Name:
    Year: 2011
    Field Note:
    The advisory boards and committees are made up of families from diverse cultural backgrounds.

FORM 14
LIST OF MCH PRIORITY NEEDS
[Sec. 505(a)(5)]

STATE: DC   FY: 2011

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase ,list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Decrease infant mortality. (ES)
2. Enhance nutrition and increase physical activity for children and youth through increased access to healthy foods and physical activity opportunities and through breastfeeding promotion. (ES)
3. Reduce teen pregnancy. (PBS, DS)
4. Increase access to medical homes for CSHCN and support coordinated, family-centered systems of care. (IBS, DS)
5. Reduce morbidity due to asthma among children and youth. (ES
6. Reduce intentional injurieis among children and youth. (PBS, DS)
7. Improve oral health among children, youth and pregnant women. (PBS, DS)
8. Reduce sexually transmitted infections in adolescents (PBS, DS)
9. Increase lead screening for children under six years of age. (PBS)
10. Improve surveillance and monitoring of maternal and child health. (IBS)

STATUS:	Active
GOAL	To increase children's participation in and receipt of EPSDT screening services
DEFINITION	Participant ratio as defined in 416 report to CMS

Numerator:
Number of Medicaid eligible beneficiaries under age 21 who received at least one initial or periodic screening service

Denominator:
Number of Medicaid eligible beneficiaries under age 21 who should receive at least one initial or periodic screening service in FY

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES	The state Medicaid agency is required to submit the 416 report to CMS annually. The participation ratio reflects adjustments based on EPSDT periodicity schedule.
SIGNIFICANCE	Low participation affects opportunities to correct many health problems and thus contributes to prevalence of children with special need.

SP(Reporting Year) #_____3

PERFORMANCE MEASURE: Prevalence of lead levels > 10 ug/dL among chldren through age 6

STATUS: Active

GOAL   To reduce/control effects of exposure to lead and resulting irreversible neurological damage

DEFINITION   DC measure reflects recent changes in CDC reccommendations re: exposure.

Numerator:
Number of children screened in the FY who have at least one positive test result.

Denominator:
Number of children screened at least once

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES   DC CLPPP lead registry Prevalence estimates are not currently population based. Installation of an automated system will provide data to estimate coverage of testing and excess exposure rates.

SIGNIFICANCE   Most DC inner city children are at high risk of exposre due to older housing stock. Exposure may result in irreversible damage.

SP(Reporting Year) # _____ 4

PERFORMANCE MEASURE: Prevalence of tobacco use among pregnant women

STATUS: Active

GOAL   To reduce the adverse effects of tobacco on pregnant women and their fetuses

DEFINITION

Numerator:
Number of women reported on birth certificates as using tobacco during pregnancy

Denominator:
Number of live births in calendar year

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES   SCHS - state birth certificate file The birth certificate data on tobacco use probably results in gross under-reporting.

SIGNIFICANCE   The adverse effect of tobacco on pregnancy and birth outcomes is well-known.

SP(Reporting Year) #_____6

PERFORMANCE MEASURE: Percent of resident women who give birth with no prenatal care or entry into prenatal care in 3rd trimester

STATUS: Active

GOAL   to improve maternal health and birth outcomes

DEFINITION   Percent of resident women who give birth with no prenatal care or entry into prenatal care in 3rd trimester

Numerator:
number of annual resident births for which birth certificate recorded no prenatal care or entry into prenatal care in 3rd trimester

Denominator:
total annual resident births for which trimester of entry is known

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES   birth certificate/ birth file. In DC there is a high proportion of missing data for trimester of entry.

SIGNIFICANCE   No or late entry prenatal care subjects the mother and infant to an array of adverse outcomes, including HIV infection, drug exposure and maternal and infant death.

PERFORMANCE MEASURE: Incidence of repeat births for teens less than 19 years of age

STATUS: Active

GOAL   to reduce the teen birth rate

DEFINITION

Numerator:
number of annual births to women less than 19 years of age not first birth

Denominator:
number of annual births to women less than 19 years of age

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES   birth certifcates/birth file

SIGNIFICANCE   Early child bearing may contribute to poor spacing of pregnancies and multiple pregnancies, which lead to adverse maternal and infant outcomes.

SP(Reporting Year) #_____8_____

PERFORMANCE MEASURE: Percentage of high school students who were in a physical fight one or more times during the past 12 months

STATUS: Active

GOAL   To decrease physical violence toward and by youth

DEFINITION   Percentage of high school students who were in a physical fight one or more times during the past 12 months as measured by item on Youth Risk Bevarior Survey

Numerator:
Estimate provided by CDC DASH based on YRBS results; number of yes responses to questionnaire item

Denominator:
Estimate provided by CDC DASH based on YRBS results; weighted number of respondents

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE   15-38. Reduce physical fighting among adolescents

DATA SOURCES AND DATA ISSUES   YRBS Biennial Survey; out-of-school youth and private school students are not included.

SIGNIFICANCE   This is both a national and a DC Healthy People 2010 objectives. It is a priority need for MFHA.

SP(Reporting Year) #_____9

PERFORMANCE MEASURE: Percent of preterm births

STATUS: Active

GOAL to reduce infant mortality and morbidity

DEFINITION obstetrical estimate of gestational age < 37 weeks as recorded on the birth certificate

Numerator:
number of live births with estimated gestational age < 37 weeks

Denominator:
number of live births

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE 16-11 Reduce preterm births

DATA SOURCES AND DATA ISSUES annual birth file NCHS suggests that estimated gestational age data is subject to reliability issues.

SIGNIFICANCE The vast majority of lbw and vlbw births are preterm. Permaturity is the leading cause of those neonatal deaths not associated with birth defects. Reduction in preterm delivery holds the greatest promise for overall reduction in infant illness, disability, and death. Preterm birth is associated with a number of modifiable risk factors, including the use of alcohol, tobacco, or other drugs during pregnancy and low prepregnancy weight or low weight gain during pregnancy. Other important risk factors for preterm birth are vaginal infections and domestic violence.

SO(Reporting Year) #_____ 1

OUTCOME MEASURE: Rate of confirmed deaths due to SIDS, average for 3-year period

STATUS: Active

GOAL   to reduce number of SIDS deaths and, in turn, the IMR

DEFINITION

Numerator:
number of investigated and confirmed DC resident SIDS deaths. Numerator is number of SIDS deaths in that calendar year.

Denominator:
number of live births in calendar year.

Units: 1000   **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES   death certificates/death file Coding and diagnoses issues have been discussed in the literature.

SIGNIFICANCE   Many SIDS deaths are preventable, and their reduction will affect the postnatal mortality rate in DC.

Form Level Notes for Form 17

Over the last three reporting years the percent of women between the ages 15-44 receiving acceptable prenatal care greater than or equal to the Kotelchuck Index increased by an average of 4% annually.

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	Annual Indicator Data				
	2005	**2006**	**2007**	**2008**	**2009**
Annual Indicator	34.4	45.3	48.0	48.0	48.0
Numerator	121	161	217	217	217
Denominator	35,175	35,513	45,182	45,182	45,182
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2.The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. *(Explain data in a year note. See Guidance, Appendix IX.)*

9. **Section Number:** Form18_Indicator 05
    Field Name: CareFirstTrimester
    Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
    Column Name:
    Year: 2011
    Field Note:
    Information taken from a 2008 birth-Medicaid linked file.

    Overall, the total (Medicaid and non Medicaid) percent of women who received prenatal care in the first trimester (74.7%) increased by 2.3 percent as compared to 73% in 2007. Source: DC 2008 State Center for Health Statistics 2008 Birth File

    This increase is also mirrored when looking at the 2008 Medicaid population 68.3% is higher than the 63.8% in 2007.

10. **Section Number:** Form18_Indicator 05
    Field Name: AdequateCare
    Row Name: Percent of pregnant women with adequate prenatal care
    Column Name:
    Year: 2011
    Field Note:
    Information taken from a 2008 birth-Medicaid linked file.

    Overall, 70.6% received an adequate Kotelchuck classification in 2008 as compared to 71.4% in 2007.

Medicaid population 61.8% is slightly better than the 60.6% in 2007.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: DC

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Informatioin)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES **Annual linkage of infant birth and infant death certificates**	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS **Hospital discharge survey for at least 90% of in-State discharges**	2	No
Annual birth defects surveillance system	1	No
Survey of recent mothers at least every two years (like PRAMS)	1	No

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: DC

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	2	No
Other:		

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

None

FIELD LEVEL NOTES

1. **Section Number:** Form19_Indicator 09A
   Field Name: BAD
   Row Name: Annual linkage of infant birth and infant death certificates
   Column Name:
   Year: 2011
   Field Note:
   Anual link is performed by the DC State Center for Health Statistics. Because of the small number of deaths the linking is performed manually.

2. **Section Number:** Form19_Indicator 09A
   Field Name: BAW
   Row Name: Annual linkage of birth certificates and WIC eligibility files
   Column Name:
   Year: 2011
   Field Note:
   CHA has been linking the WIC file with the Birth File for the last 3 years.

3. **Section Number:** Form19_Indicator 09A
   Field Name: BAN
   Row Name: Annual linkage of birth certificates and newborn screening files
   Column Name:
   Year: 2011
   Field Note:
   CHA links the birth file annually with the metabolic screening file providing the program with annual screening data on coverage to the newborn population.

4. **Section Number:** Form19_Indicator 09A
   Field Name: Discharge
   Row Name: Hospital discharge survey for at least 90% of in-State discharges
   Column Name:
   Year: 2011
   Field Note:
   In the past CHA received a hospital discharge dataset, but now the practice is being reviewed by the department.

5. **Section Number:** Form19_Indicator 09A
   Field Name: BirthDefects
   Row Name: Annual birth defects surveillance system
   Column Name:
   Year: 2011
   Field Note:
   The District of Columbia does not have a birth defects registry.

6. **Section Number:** Form19_Indicator 09A
   Field Name: RecentMother
   Row Name: Survey of recent mothers at least every two years (like PRAMS)
   Column Name:
   Year: 2011
   Field Note:
   The District of Columbia does not have a PRAMS registry or a PRAM-like survey process in place.

7. **Section Number:** Form19_Indicator 09A
   Field Name: BAM
   Row Name: Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files
   Column Name:
   Year: 2011
   Field Note:
   CHA has been able to link Medicaid Recipient data with the birth file for the last 4 years.

Form Level Notes for Form 20

None

HEALTH STATUS INDICATOR MEASURE # 01A

The percent of live births weighing less than 2,500 grams.

Annual Indicator Data

	2005	2006	2007	2008	2009
Annual Indicator	8.5	9.0	11.1	10.5	10.5
Numerator	674	769	989	960	960
Denominator	7,940	8,522	8,870	9,135	9,135
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2.The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. *(Explain data in a year note. See Guidance, Appendix IX.)*					
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes

1. **Section Number:** Form20_Health Status Indicator #01A
   Field Name: HSI01A
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Data for 2009 will be reported in 2011. Data for 2008 is reported here.

2. **Section Number:** Form20_Health Status Indicator #01A
   Field Name: HSI01A
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   The percent of live births weighing less than 2,500 grams decreased from 11.1 percent on 2007 to 10.5 percent in 2008, a decrease of 5.4 percent.

   Numerator: Number of infants weighing less than 2,500 grams.
   Denominator: Number of District resident infants born in 2008
   Data source: The District of Columbia State Center for Health Statistics 2008 Birth File.

3. **Section Number:** Form20_Health Status Indicator #01A
   Field Name: HSI01A
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   Source: The District of Columbia State Center for Health Statistics 2007 Birth File.

   The denominator: Out of the 8870 live births, only 8862 had birthweights recorded, and 8 infants w/o recorded birthweights. Those eight were coded as 9999 for missing.

HEALTH STATUS INDICATOR MEASURE # 01B

The percent of live singleton births weighing less than 2,500 grams.

Annual Indicator Data

	2005	2006	2007	2008	2009
Annual Indicator	7.0	7.7	9.3	8.8	8.8
Numerator	535	635	796	772	772
Denominator	7,636	8,198	8,543	8,788	8,788
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2.The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. *(Explain data in a year note. See Guidance, Appendix IX.)*					
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes

1. **Section Number:** Form20_Health Status Indicator #01B
   Field Name: HSI01B
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Data for 2009 will be reported in 2011. Data for 2008 is reported here.

2. **Section Number:** Form20_Health Status Indicator #01B
   Field Name: HSI01B
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   The percent of singleton births weighing less than 2, 500 grams has fallen from 9.3 percent in 2007 to 8.8 percent in 2008, decrease of 5.3 percent.

   Numerator: Number of singleton infants weighing less than 2,500 grams.

   Denominator: Number of singleton births

   Data source: The District of Columbia State Center for Health Statistics 2008 Birth File.

3. **Section Number:** Form20_Health Status Indicator #01B
   Field Name: HSI01B
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   Source: The District of Columbia State Center for Health Statistics 2007 Birth File.

   The numerator reflects that n=796 live singleton births weighing <2,500 grams.

   The denominator (n=8543) accounts for the number of live singleton births.

HEALTH STATUS INDICATOR MEASURE # 02A

The percent of live births weighing less than 1,500 grams.

Annual Indicator Data

	2005	2006	2007	2008	2009
Annual Indicator	2.7	2.5	2.9	2.6	2.6
Numerator	214	217	258	234	234
Denominator	7,940	8,522	8,870	9,135	9,135
Check this box if you cannot report the numerator because 1. 27. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2011
Field Note:
Data Source: This data was provided by Brian Campbell, Special Assistant in the District of Columbia Department of Health Services Income Maintainance Administration. The data was abstracted by Mr. Campbell from ACEDS (Automated Client Eligibiligy Determinatgion System).
Actual Number: The actual number of participants in 2009 was 16,110.

28. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2011
Field Note:
Data Source: The Kaiser Family Foundation's State Health Profile: District of Columbia-2008

Link: http://www.statehealthfacts.org/profileglance.jsp?rgn=10&rgn=1

29. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2011
Field Note:
Data Source: The Kaiser Family Foundation-Monthly CHIP Enrollment-District of Columbia

Link: http://www.statehealthfacts.org/profileind.jsp?ind=236&cat=4&rgn=10&cmprgn=1

Note: The data is a cross sectional monthly enrollment average.

30. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_FoodStampNo
Row Name: Number enrolled in food stamp program
Column Name:

Year: 2011
Field Note:
Data Source: This data was provided by Brian Campbell, Special Assistant in the District of Columbia Department of Health Services Income Maintainance Administration. The data was abstracted by Mr. Campbell from ACEDS (Automated Client Eligibiligy Determinatgion System).
Actual Number: The actual number of participants in 2009 was 99203.

31. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2011
Field Note:
Data Source: A data request was submitted to the District of Columbia WIC program.

Note: This data reflects enrollment from 2009 to May 2010.

32. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2011
Field Note:
Source: Metropolitan Police Department, Washington DC
Criminal Justice Information System (CJIS) Arrest Data
Queried for CY 2008 vs 2009 by Race and Ethnicity

Note: CJIS data as of 06/29/2010 were queried. These totals include non-homicide arrest data. Totals are based solely on the top arrest charge. One person may be booked on more than one arrest charge. Excludes arrests for which no location could be identified between and of all arrests.
Please note that changes to MPD's PSA and District boundaries occasionally occur. The statistics above are based on current police boundaries as of September 2, 2007.
For the purposes of the CJIS Arrest Report, the term "juvenile" used above is defined as individuals under the age of 18 years (= 17 years of age). These "juvenile" totals may include Title 16 cases where juveniles are tried as adults.The above non-homicide arrests reflect arrests made by all agencies in the District of Columbia.

33. **Section Number:** Form21_Indicator 09A
Field Name: HSIRace_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2011
Field Note:
Data Source:
Numerator: Data Request from DCPS Office of Data and Accountability (contact Hella Bel Hadj Amor) (n=1357)

Denominator: DCPS Webpage

FORM 11
TRACKING PERFORMANCE MEASURES
[SECS 485 (2)(2)(B)(III) AND 486 (A)(2)(A)(III)]
STATE: DC

Form Level Notes for Form 11

The death rate among children 1-14 years old caused by motor vehicle crashes has decreased from 3.2 deaths caused by motor vehicle accidents per 100,000 children in the District in 2007 to 1.1 motor vehicle related deaths per 100,000 children in the District in 2008. An examination of the three year trends shows a marked decrease from 4.2/100,000 in 2006, 3.2/100,000 in 2007 and 1.1/100,000 in 2008.

STATE PERFORMANCE MEASURE # 1 - NEW FOR NEEDS ASSESSMENT CYCLE 2011-2015

Prevalence of tobacco use among pregant women.

Field Level Notes

1. **Section Number:** Form12_State Outcome Measure 1
   Field Name: SO1
   Row Name:
   Column Name:
   Year: 2009
   Field Note:
   The District of Columbia has a 2-year delay for reporting birth data. Currently, the number of infant deaths and births in 2008 is used to report information for 2009. The 2009 data will be available in 2011, and this measure will be updated.

2. **Section Number:** Form12_State Outcome Measure 1
   Field Name: SO1
   Row Name:
   Column Name:
   Year: 2008
   Field Note:
   Numerator: Number of SIDS deaths
   Denominator: Number of live births

   Source Numerator: The District of Columbia State Center for Health Statistics 2008 Linked Infant Birth/Fetal Death File.

   Source Denominator: The District of Columbia State Center for Health Statistics 2008 Birth File

   Although the number of confirmed deaths due to SIDS decreased by nearly half in 2008 compared to 2007, examination of three-year rolling averages shows no change, an average rate of 0.7, for the periods 2005-2007 and 2006-2008. This measure meets the Annual Performance Objective of a three-year average of 0.7 deaths due to SIDS per 1,000 live births.

3. **Section Number:** Form12_State Outcome Measure 1
   Field Name: SO1
   Row Name:
   Column Name:
   Year: 2007
   Field Note:
   Source: The District of Columbia State Center for Health Statistics 2005, 2006 and 2007 Birth Files and Death files.

SP(New for Needs Assessment cycle 2011-2015) #_____1_____

PERFORMANCE MEASURE: Prevalence of tobacco use among pregant women.

STATUS: Active

GOAL   To decrease preterm births, infant mortality, and asthma by reducing the prevalence of tobacco use among pregnant women

DEFINITION   Number of women who reported using tobacco during pregnancy

Numerator:
Number of women reported on birth certificates as using tobacco during pregnancy

Denominator:
Number of live births in calendar year

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE   27-6 Increase smoking cessation during pregnancy

DATA SOURCES AND DATA ISSUES   State center for health statistics (vital records) birth certificate file The birth certificate data on tobacco use probably results in gross under-reporting.

SIGNIFICANCE   The adverse effect of tobacco on pregnancy and birth outcomes is well-known. This is a National Health People Measure. Smoking is recognized as the number one preventable risk factor associated with adverse birth outcomes in the United States. By eliminating maternal smoking during pregnancy, we can reduce infant mortality, low birth weight births, and preterm deliveries

SP(New for Needs Assessment cycle 2011-2015) #_____2

PERFORMANCE MEASURE: Percent of resident women who give birth with no prenatal care or no early entry into prenatal care by the 3rd trimester.

STATUS: Active

GOAL Decrease the infant mortality rate by decreasing the percent of resident women who give birth with no prenatal care or no early entry into prenatal care by the 3rd trimester

DEFINITION Percent of resident women who give birth with no prenatal care or entry into prenatal care by the 3rd trimester

Numerator:
Number of annual resident births for which birth certificate recorded no prenatal care or entry into prenatal care by 3rd trimester

Denominator:
Total annual resident births for which trimester of entry is known.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE 16-6 Increase the proportion of pregnant women who receive early and adequate PNC

DATA SOURCES AND DATA ISSUES State center for health statistics (vital statistics)birth certificate/ birth file. In DC there is a high proportion of missing data for trimester of entry.

SIGNIFICANCE No PNC or late entry into prenatal care subjects the mother and infant to an array of adverse outcomes, including HIV infection, drug exposure and maternal and infant death.

SP(New for Needs Assessment cycle 2011-2015) #_____3_____

PERFORMANCE MEASURE: Incidence of repeat teen births among girls less than 19 years of age.

STATUS: Active

GOAL To reduce the rate of rapid repeat teen births.

DEFINITION Repeat births to women less than 19 years of age

Numerator:
Number of annual births to women less than 19 years of age but not including first births

Denominator:
Number of annual births to women less than 19 years of age

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE 9-2 Reduce the proportion of birhs occurring within 24 months of a previous birth.

DATA SOURCES AND DATA ISSUES Vital statistics birth certifcates/birth file

SIGNIFICANCE Adolescent mothers who have repeat births compound their risk of poorer medical, educational, economic, and parenting outcomes.

SP(New for Needs Assessment cycle 2011-2015) #_____4

PERFORMANCE MEASURE:	Percent of preterm births.
STATUS:	Active
GOAL	To decrease infant mortality by reducing the number of preterm births.
DEFINITION	Obstetrical estimate of gestational age < 37 weeks as recorded on the birth certificate

Numerator:
number of live births with estimated gestational age < 37 weeks

Denominator:
number of live births

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-11 Reduce preterm births

DATA SOURCES AND DATA ISSUES

Annual birth file NCHS suggests that estimated gestational age data is subject to reliability issues.

SIGNIFICANCE

The vast majority of lbw and vlbw births are preterm. Permaturity is the leading cause of those neonatal deaths not associated with birth defects. Reduction in preterm delivery holds the greatest promise for overall reduction in infant illness, disability, and death. Preterm birth is associated with a number of modifiable risk factors, including the use of alcohol, tobacco, or other drugs during pregnancy and low prepregnancy weight or low weight gain during pregnancy. Other important risk factors for preterm birth are vaginal infections and domestic violence.

SP(New for Needs Assessment cycle 2011-2015) #_____5_____

PERFORMANCE MEASURE:	Rate of physcical violence towards and by youth in DC.
STATUS:	Active
GOAL	To reduce the rate of intentional injury among children and youth by decreasing physical violence towrd and by youth in DC.
DEFINITION	Percentage of high school studnts who were in a physical fight one or more times during he past 12 months as meured by it3ms on the Youth Risk Behavior Survey

Numerator:
Estimate provided by CDC DASH on YRBS reults; number of yes responses to questionnaire item "Were you in a physical fightt one or more times during the past 12 months".

Denominator:
Estimate provided by CDC DASH based on YRBS results; weight number of respondents.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE	15-38 Reduce physical fighting among adolescennts.
DATA SOURCES AND DATA ISSUES	YRBS Biennial Survey: out-of-school youth and privvate school students are not included.
SIGNIFICANCE	Reducing Youth Violence is Critical to the Well-Being of Youth and All Citizens. Youth violence is a problem confronting communities throughout DC and impacts people from different ethnic backgrounds. The violence often occurs because of perceived lack of respect that is fed by impulsive action, anger and rage. They are often committed without forethought and there is often little consideration of the consequences.

SP(New for Needs Assessment cycle 2011-2015) #_____6_____

PERFORMANCE MEASURE:	Prevalence of Elevated Blood Lead among children less than 6 yers of age.
STATUS:	Active
GOAL	To reduce/control effects of exposure to Elevated Blood Lead (EBL) levels, among children lessss than 6 years of age thouh increasd lead screening.
DEFINITION	DC measure reflects the most recent changes in CDC recommendations.
	Numerator: Number of children screened in the FY who have at least one positive test reult (ELB >= 10 ug/dl).
	Denominator: Number of children screened at least once.
	Units: 100 **Text:** Percent
HEALTHY PEOPLE 2010 OBJECTIVE	8-11 Eliminate elevated blood lead levels in children
DATA SOURCES AND DATA ISSUES	DC Childhood Lead Poisoning Prevention Program (CLPPP) Lead Registry CLPPP environmental investigations include tap water sampling, and resulted during 2009 in the identifidation of elevated levels of lead in tap water in about 5% of th cases, triggering a risk assessment report provided by CLPPP to the EBL families affected.
SIGNIFICANCE	Most DC inner city children are at high risk of exposure due to older housing stock. Exposure may result in irreverible brain/developmental damage.

SP(New for Needs Assessment cycle 2011-2015) #_____7_____

PERFORMANCE MEASURE:	Percent of syphillis and gonnorhea cases among adolscents age 15-24 in the District of Columbia.
STATUS:	Active
GOAL	To reduce the rate of sexually transmitted infections in adolescents age 15-24 by decreasing the number of syphillis and gonnorhea cases.
DEFINITION	Confirmed cases of syphillis and gonnorhea among adolescents age 15-24 in DC.

Numerator:
Number of confirmed cases of syphillis and gonnorhea in adolescents age 15-24 in DC.

Denominator:
Number of DC adolescents age 15-24 years old.

Units: 100   **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE	25-3 Eliminate sustained domestic transmission of Primary and Secondary syphillis
	25-2 Reduce gonnorhea.
DATA SOURCES AND DATA ISSUES	CDC STD.MIS database
SIGNIFICANCE	STI can increase one's vulnerability to HIV infection, and impact fertility, maternal and child health, or both.

SP(New for Needs Assessment cycle 2011-2015) #   8

PERFORMANCE MEASURE:	Percent of 3rd graders that are considered overweight or obese.
STATUS:	Active
GOAL	To enhance nutrition and physical activity for children and youth through increased access to healthy foods and physical activity opportunities and breastfeeding promotion.
DEFINITION	Body mass index (BMI) is a practical measure used to determine overweight and obesity. BMI is a measure of weight in relation to height that is used to determine weight status. Adults with a BMI above 25 are overweight, and those with a BMI above 30 are obese. For children and teens, weight status is determined by plotting weight and height by age and sex on CDC growth charts and determining the percentiles. Children and adolescents in the 85th to 95th percentiles are at risk of being overweight, and those in the 95th percentile or above are overweight.

Numerator:
Number of children in 3rd grade with BMI in the 85th to 95th percentiles. These children are at risk of being overweight, and those in the 95th percentile or above are overweight.

Denominator:
All 3rd grade children in DCPS.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE	19-3 Reduce the proportion of children and adolescents that are ovewegith or obese
DATA SOURCES AND DATA ISSUES	Data is collected at the school level but not consistently on all children.
SIGNIFICANCE	Overweight and obesity substantially raise the risk of illness from high blood pressure, high cholesterol, type 2 diabetes, heart disease and stroke, gallbladder disease, arthritis, sleep disturbances and problems breathing, and certain types of cancers. Obese individuals also may suffer from social stigmatization, discrimination, and lowered self-esteem.

SO(New for Needs Assessment cycle 2011-2015) #_____1

OUTCOME MEASURE:	Rate of confirmed deaths due to SIDS, average for 3-year period
STATUS:	Active
GOAL	to reduce number of SIDS deaths and, in turn, the IMR
DEFINITION	

Numerator:
number of investigated and confirmed DC resident SIDS deaths. Numerator is number of SIDS deaths in that calendar year.
Denominator:
number of live births in calendar year.
Units: 1000   **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES	death certificates/death file Coding and diagnoses issues have been discussed in the literature.
SIGNIFICANCE	Many SIDS deaths are preventable, and their reduction will affect the postnatal mortality rate in DC.
